Reinforcement	Improvement
the background picture and overall layout of the website is clean.	have something more that tells why people should join
I like how you have the sign in page into the admin.	It would be cool to have the admin sign in work to only allow people who have access to it to be able to get into it.
I like your detailed side bar for navigation.	There are plenty of images that highlight the entrepreneurship club, it would be cool if you could use them and showcase the club and its members.
I like the design of the home screen I like the side bar as well I like the animations	I wish that the admin panel had more controls. Maybe like uploading recent photos, ect
I like how organized and clean your website looks	I wish that when you click on the images on one of your pages it wouldn't pop out
I like how professional and consistent their website looks. I am very excited to see what the final project will look like! I like how many elements they have on the website it looks very great.	I think it is just seriously amazing I can not think of anything that they should do to make it better it's just great.
The design layout is very cool	An improvement that you should add is for the admin login change the input type for the password to password so that it doesn't show your password when you type it in.
I liked their homepage and how everything is clear.	I wish they worked on the login privacy tho they have done a good job.

I like the big logo on the home page to really get the users attention and I like that the mission statement is included.	there wasn't as much white spaces in the admin
I really like the logo you have at the top of the screen. I love gradients. All of Ella's pages looked really good.	It would be cool if the background of your home page was a different color other than white. This applies to a lot of your pages. It works on the about page and member pages. Some of the text would benefit from being larger. Also maybe make the Concordia College logo larger.
each link in the hamburger menu has a little icon looks nice I like the photos on your webpage	none
I like how you utilized Concordia's school colors, since you're creating a website for a conco club. That consistency is really helpful for users! I like the temporary image place holders you used, they were funny!	It would be cool if you had a foot note so people don't have to scroll back up to the header nav; especially when switching between the pages.
i like the simplicity of the website.	the schedule page is a little too cumbersome.
the ai generated images of the corn.	I think it's pretty dense. there's a lot of elements and it might be confusing
Your page is easy to navigate and looks good. the mission statement pop up is very creative	this page was out already! it looks very good.
Really nice job on the progress so far.	Can't think of any great ideas.

Unclear	Alternatives
nothing here, pretty clear website	Maybe have a bit less words because I'm not sure if people will or want to read that much or just maybe shorten it a bit
I'm unsure about the main graphic, it kind of looks blurry but it also could just be the screen.	Making a way to turn off the effect where the button pops out at you.
I don't know if your admin page is detailed or styled enough to use effectively.	Have you considered adding a calendar and how that will change your design layout for your events page?
Where is the login located?	Have you considered using an alternative logo on the nav bar that you can see better?
No concerns	no suggestions
I wonder if the club would have the ability to modify all of the text and everything because there is a lot of features on the website.	I would say that this website is great and I can not think of anything else they should add or anything it is just great.
na	na
I am unsure about the if the members had the options for editing.	Just making it clear as I don't know. thanks

how you will see important dates easily	I think it looks really good, not much more I can add!
Have you chosen any fonts yet, or are they set at the default ones?	Have you considered making the background colors consistent and something other than white? Some of the pages have better designs than others and it would be nice if all of the pages where at this quality.
none	Different picture selection for the header? maybe just the conco shield as the current picture is a bit small
I am unsure about how you have a lot of pages but only three page names on your header. Having most stuff in your menur bar that's hidden makes it difficult to show users there are so many more pages that they can access.	Have you considered making your header bigger, so that we can see the logo better too.
nothing	nothing, just more CSS would be nice i like this a lot.
the ferrets	its cool
how you got instagram to connect with out violating terms and services.	sharing that with other groups.
Think I understood everything correctly.	Can't think of any great ideas.
