ENTREPRENEURSHIP CLUB

PIXEL PIONEERS

ELEVATOR PITCH

Clubs at Concordia are an important aspect of our campus but there aren't a whole lot of options if you wanted to search for one to either join or collaborate with outside of Cobber Connect. We have made this easier for students who want to join the Entrepreneurship Club at Concordia. Now with their own website they are able to fully express their club to other students who wish to be a part of something.

WHAT HAS GONE WELL

- Code collaboration on GitHub, we are merging code without problems.

- We were able to make meaningful changes compared to our initial designs.

- Communication has gone well among group members.

DESIGN MOCKUPS

CHALLENGES

- Timely completion of code

- Coding is hard :(

- Merging on branches on GitHub

CONCLUSION

We have a lot of work to do, but we are

excited to finish this website and make it

functional for the Entrepreneurship Club!

NOW LET'S SEE THAT DEMO!
